Roland Sebastien

DevOps / QA Tester

Brussels, Belgium | +32 492 42 72 25 | sebastien.roland@icloud.com

Profil

 ROLANDsebastien   in sebastien roland   ROLANDsebastien

Summary

Following a successful career transition into a junior DevOps position, complemented by an ISTQB certification, I've developed a robust skill set in key technologies like Kubernetes, Docker, and Terraform. My non-traditional career path has honed my adaptability and attention to detail, which are essential for collaborative integration and deployment projects.

I'm keenly interested in artificial intelligence and am also equipped to grow into roles such as a system administrator or other related fields. My profile qualifies for the Activa Brussels program, and I am available for an individual professional training agreement (FPIE).

Experience

Workstation
06/2025 - présent
DevOps Intern
Brussels, Belgium
https://www.workstation.co.uk

- Setup and configuration of Kubernetes clusters with k3s for development environments.
- Creation and optimization of Docker images for various applications.
- Development of Terraform scripts to automate the creation and management of virtual machines on Microsoft Azure.
- Use of Ansible playbooks for automated provisioning and configuration of virtual machines.
- Bash scripting.
- Linux.

CellTest RTBF
08/2024 - 10/2024
intern
Brussels, Belgium
https://auvio.rtbf.be

- Active participation in the quality assurance of the AUVIO streaming service by performing functional tests across a wide range of platforms (Web, Mobile, Smart TV, Console).
- Use of Squash Test for designing test cases and organizing functional and regression testing campaigns.
- Identification, documentation, and tracking of defects via Jira within the AUVIO project testing team, facilitating their resolution by the development teams.

Delhaize
09/2022 - 05/2024
Order Picker
Zellik, Belgium

Résidence P&V
12/2011 - 05/2021
